Variable: **FSTJOB** *Position:* 1295 *Length:* 2

Derived variable: First job identifies the job the respondent held at time of leaving full-time schooling, or the job first started after leaving full-time schooling (jobs 1 to 7 collected), for those respondents who were no longer full-time students in December 1999. C=First job after leaving full-time schooling identifies the job a respondent held at the time of leaving full-time schooling or the job s/he first started after leaving full-time schooling. During survey collection, respondents who were no longer full-time students in December, 1999 were asked to report the first job they worked at after leaving full-time schooling. A procedure was then created to validate the job reported by respondents as their first job after leaving full-time schooling and/or when not reported, to identify one of the other jobs reported as being "first job".

Note: The verification of the job eligibility is not performed on all jobs, but on a maximum of 6 jobs (first 6 jobs reported by the respondent). However, this maximum can be increased by one eligible job in the case where a seventh job (first job after leaving full-time schooling) is reported and that this job ends in 1999 and is different from the jobs (1 to 6) reported earlier. In this case, this seventh job is automatically considered as eligible. For this reason, two variables are created in order to calculate the number of jobs in 1999. The variable ELGJOBV indicates the number of eligible jobs up to a maximum of 7 jobs (based on first 6 jobs + first job after leaving full-time schooling), while the second variable ELGJOBNV contains the remaining number of jobs for which no verification was possible.

Variable: **ELGJOBNV** *Position:* 1320 *Length:* 2

Derived variable: The total number of jobs whose eligibility could not be verified. Use this variable with caution.
Note: The total number of jobs in 1999 is equal to the sum of ELGJOBV and ELGJOBNV.

Respondents were asked to describe the kind of work they were doing and their most important activities or duties. The information from these responses was then used by coders to assign an occupation code from the 1991 Standard Occupational Classification (SOC). The most detailed SOC code has 1 character, followed by 3 digits. This classification is composed of four levels of aggregations. There are 10 broad occupational categories containing 47 major groups that are further subdivided into 139 minor groups. The minor groups contain 514 unit groups. If the respondent did not specify an occupation or did not define it in sufficient detail to permit coding then a code of 11 was assigned. See Appendix B for occupational codes.

Note: Respondents who were: (1) full-time students in December 1999 and did not work at a job during 1999; (2) not full-time students in December 1999, did not work at a job during 1999, and indicated not having had a job after leaving full-time schooling; or (3) whose work history for 1999 and whose first job after leaving full-time schooling are unknown -- were asked if they have ever worked at a job for pay, at odd jobs for pay, or worked in their family's farm or their family's business with or without pay. Respondents were asked to describe the kind of work they were doing and their most important activities or duties. The information from these responses was then used by coders to assign an occupation code from the 1991 Standard Occupational Classification (SOC). The most detailed SOC code has 1 character, followed by 3 digits. This classification is composed of four levels of aggregations. There are 10 broad occupational categories containing 47 major groups that are further subdivided into 139 minor groups. The minor groups contain 514 unit groups. If the respondent did not specify an occupation or did not define it in sufficient detail to permit coding then a code of XXXX was assigned. See Appendix B for occupational codes.

Note: Respondents were asked about the first language that they first learned at home in childhood and still understand. This concept relates to mother tongue. Although respondents may have declared that they learned two or more languages simultaneously, interviewers attempted to have these respondents choose one language over the other. However, in the few circumstances where respondents would not choose between English and French as their first language, the cases have been included in the new category "Other English and French".

HERE IS A LIST OF SPECIAL CODES USED WHEN CODING *NAICS+ and *SOC-91+ BY THE IOCU UNIT

sept/99/gs

SPECIAL CODES

/1

NAICS:

1100 : (FARMING n.e.c.)

When it is impossible to determine the type of farm reported in the industry field (i.e., the job description is insufficient to determine whether it is a crop or livestock farm) 1100 is assigned

2100 : (MINING n.e.c.)

If it is impossible to determine the type of mine reported in the industry field (i.e., the job description information is insufficient to determine whether it is a metal or non-metal mine) 2100 is assigned.

6220 : (HOSPITALS)

In NAICS, hospitals are divided according to type of care provided. Since LFS does not need this level of detail, all Hospitals (6221-6223) are coded to generic code 6220.

6230 : (SPECIAL CARE)

In NAICS, special care institutions are divided according to type of care provided. Since LFS does not need this level of detail, all Special Care Facilities (6231-6239) are coded to generic code 6230.
