1. Data on paid hours and financial data for residential care facilities may include amounts related to activities that are outside the scope of residential care, such as outpatient or hospital care. This phenomenon is not widespread outside of Quebec, but in this province, such situations are more likely. For this reason, financial data pertaining to non-residential care activities in Quebec were statistically removed. Nevertheless, caution should be exercised in comparison with data from other provinces.
2. Principal characteristic of predominant group of residents and size of facility.
3. To comply with the confidentiality requirements of the Statistics Act, some data for the Territories were combined. Data from homes for the aged with 50 beds or more were combined with those having 20 to 49 beds. Data from facilities with 20 beds or more, for persons with mental disorders, were included with facilities that had 1 to 19 beds. Data for the category "Other" were also included with facilities for persons with mental disorders, 1 to 19 beds.
